Major Projects

Natural farming (Entey Gramam -Adukkala Thottam):

Natural farming was a search for eco friendly and farmer friendly alternate systems of farming and a method of reverting to non-chemical agriculture to attain sustainability in production. It is a system to find the total changes occurring in the structure of dead soil. Only by knowing soil in all its complexity, while maintaining its functionality and quality through the action aimed at protecting its properties and acknowledging the importance it assumes in the quality of life worldwide, can we embark on the truly sustainable use of soil perceived as a resource and build a proper Man/Soil relationship to be left to future generations. The whole village was divided into different slots and the campers according to their group were instructed to start their work in the particular houses allotted to them. After the preparation the land the volunteers started planting the saplings. The saplings were of vegetables, fruit bearing plants, tubers of banana were brought for planting. The volunteers with immense passion started to plant the saplings. The excitement and passion of our volunteers and whose motto is to do service with the aim "Not me but you" was spread in the very blood and bones of all the volunteers.
