

## DVV CLARIFICATION 7.1.1.1

# INCINERATOR

## PTA SPONSORED

(2018-19).

Good menstrual hygiene practices means that women and adolescent girls are using a clean menstrual management material to absorb or collect menstrual blood, that can be changed in privacy as often as necessary for the duration of a menstrual period, using soap and water for washing the body as required, and having access to safe and convenient facilities to dispose of used menstrual management materials. Poor menstrual hygiene management (MHM) can negatively impact the health and psychosocial well-being of women and girls. Moreover, the structural mechanisms in our society for achieving a more consistent and coherent approach to waste management seems to be generally sensitive to gender differences and inequalities and are still weak. It is this background, the Parent Teacher Association of the College decided to construct an incineration for the welfare of girl students. The deliberations that led to this decision itself was step towards gender equity.
