

PALLIATIVE CARE DAY 2018
ON
15-01-2018

People from around the world who have been impacted by a life-limiting illness -- either personally or by supporting a loved one -- will be making their voices heard, asking policy makers to pay attention to prioritize palliative care policies and services. Further, people who have been standing in solidarity with them -- local leaders, volunteers, advocates, clinicians -- will be volunteering their time to amplify this public message: Palliative Care: it's "My Care, My Right."

EMEA College SIP Unit observed Palliative Care Day on 15-01-2018. As part of the observation volunteers visited homes with community participation and provided home care to the bedridden patients. 28 SIP Volunteers were participated in the programme.
