Background and Relevance of the Youth Day and Webinar

The intent of the webinar on 'Youth and Leadership' was to indulge youth in leadership roles and enable them to thrive in the present-day world. On the occasion of International Youth Day, which is usually commemorated on 12th August every year, we needed to entrust the youth with their potential and aptitude. Webinars help to solve the doubts and scepticism surrounding a subject and help to impart a clearer understanding for students. Giving right guidance to youth is crucial and the International Youth Day is all about helping the young people to find personal satisfaction and positive environment. Proper communication forms the right mindset.

The development of leaderships contributes greatly to the positive development of young people and communities. Leadership skills such as goalsetting, problem solving and sound decision making, are not necessary for leaders; these skills are needed for success in today's world. Youth are always able to open new doors and access one's fullest potential not only for themselves but for those around as well. Youth leadership can bring dynamism and innovation to the world if properly trained and guided. Therefore, conducting a webinar on youth and leadership will make the audience aware about these rules and duties. It will make youth exercise authority over themselves. For all these reasons, it is very necessary to conduct a webinar on the same.
